ISSUED BI-MONTHLY

CAPITOLA is situated on Monterey Bay, 80 miles south of San Francisco and 400 miles north of Los Angeles on the Southern Pacific (Coast Lines) Railroad. Three miles east of Santa Cruz.

With deepest sorrow we announce the death of

MR. ALONZO J. BROWN

our Secretary and Treasurer

at 4:30 p. m., May 21, 1926. His passing was caused by a sudden and unexpected attack of Angina Pectoris, while listening in on his radio.

Mr. Brown was the father of our Mr. James A. Brown and had been identified with the Brown Bulb Ranch for more than six years. Prior to coming to California to join his son in the bulb business he lived at Noblesville, Indiana, where he founded the Wainwright Trust Company and served as its President for over twenty years.

Mr. Brown was sixty-eight years old and is survived by his father, Mercer Brown of Spiceland, Ind., who is over ninety years old, his wife, and sons, James A. Brown of Capitola, and Dr. H. S. Brown of Arroyo Grande, Calif. He was a Quaker by birth.

TRITELEIA

A very nice pot plant that will bloom for a long time, is possible when three to five of these bulbs are placed in a four or five inch pot. Come in nice for Easter, etc.

TRITELEIA VIOLACEA is one of the Quarantined bulbs. We now have a fair stock of these and will be able to deliver them this next Fall. Each bulb produces a number of blooming plants and they are hardy in the East. Fine for borders. The bulbs are about $\frac{5}{8}$ to $\frac{3}{4}$ size and resemble a Freesia bulb. The foliage is thick and of a nice green shade. Flowers are violet blue color and star shape. They bloom for several weeks during the Early Spring. Flowers are often used for funeral work but principal use is for bedding or for borders. You will find them profitable if forced also as they will bloom about Christmas. Cool temperature is best when forced, about same as freesias.

LAPAROSIA BULBS

Sometimes called a Freesia. Very similar to Freesias. Has broader leaves and larger flowers. Bulbs resemble a Baby Gladiolus bulb. Color Scarlet, Salmon and light Salmon Pink. Delivery in August, September, October per 500, \$12.50; per 1000, \$23.00.

SPECIALLY PREPARED FOR FORCING AND FOR EXTRA EARLY FLOWERS WHEN PLANTED OUTSIDE.

Our Gladioli bulbs are better than Holland or Eastern bulbs, because they have nine months growing season, which gives more time for the full development of the flowering qualities, and still leaves two months for natural curing in the ground before lifting.

DON'T FORGET OUR BULBS ARE HARVESTED DORMANT AT LEAST SIXTY DAYS AHEAD OF EASTERN BULBS AND CAN BE PLANTED NOW INSIDE WHILE EASTERN BULBS SHOULD BE PLANTED AFTER JANUARY 1ST.

SPANISH IRIS

Were imported by us in quantities many years ago. We are now prepared to deliver planting stock. If you import these bulbs now from Europe you have to get a special permit, then you pay Consular fees, transportation to the steamer from the European grower's place, then you must pay Ocean insurance, Ocean freight, 30% duty to U. S. customs, brokers' fees in New York, express to Washington, D. C., so the Horticultural Board may inspect them, then express to your town. Also some other costs usually develop before you get your bulbs. All of this takes much time and often there is a heavy loss sustained.

VARIETIES AND PRICES OF SPANISH IRIS BULBS.

Grow some of the smaller sizes outside next winter. Frost and freezing does not hurt them. Cut some flowers the first year and force the bulbs the next winter. They can not now be imported except under great expense, risk and trouble. Our prices are right. Delivery at once.

Prices per 1000 bulbs.
